The diagram illustrates a call flow from two source functions to a target function. Two white boxes on the left represent the source functions: 'smacc2::client\_behaviors::CbWaitActionServer::onEntry' (top) and 'smacc2::client\_behaviors::CbWaitNode::onEntry' (bottom). Two blue arrows originate from these boxes and point to a single gray box on the right, which represents the target function: 'smacc2::SmaccAsyncClientBehavior::postFailureEvent'.
