

smacc2::ISmaccStateMachine
::disposeStateAndDisconnectSignals

smacc2::SmaccStateMachine
Base::initiate_impl

smacc2::ISmaccStateMachine
::getLogger

```
graph LR; A["smacc2::ISmaccStateMachine  
::disposeStateAndDisconnectSignals"] --> C["smacc2::ISmaccStateMachine  
::getLogger"]; B["smacc2::SmaccStateMachine  
Base::initiate_impl"] --> C;
```

The diagram illustrates two function calls pointing to a common target. On the left, there are two white rectangular boxes. The top box contains the text 'smacc2::ISmaccStateMachine' followed by '::disposeStateAndDisconnectSignals' on the next line. The bottom box contains 'smacc2::SmaccStateMachine' followed by 'Base::initiate_impl' on the next line. On the right, there is a gray rectangular box containing 'smacc2::ISmaccStateMachine' followed by '::getLogger' on the next line. Two blue arrows point from the right side of the two white boxes to the left side of the gray box, indicating that both functions call the 'getLogger' method of the 'ISmaccStateMachine' interface.
