

smacc2::ISmaccOrthogonal
::addClientBehavior

smacc2::ISmaccOrthogonal
::runtimeConfigure

smacc2::ISmaccOrthogonal
::getName

```
graph LR; A["smacc2::ISmaccOrthogonal::addClientBehavior"] --> C["smacc2::ISmaccOrthogonal::getName"]; B["smacc2::ISmaccOrthogonal::runtimeConfigure"] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes with black borders contain the method signatures 'smacc2::ISmaccOrthogonal::addClientBehavior' (top) and 'smacc2::ISmaccOrthogonal::runtimeConfigure' (bottom). On the right, a gray rectangular box with a black border contains the method signature 'smacc2::ISmaccOrthogonal::getName'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both 'addClientBehavior' and 'runtimeConfigure' depend on or call 'getName'.
