Events

```
graph LR; A[smacc2::state_reactors::EgRandomGenerator::onEntry] --> C[smacc2::state_reactors::EgRandomGenerator::postRandomEvents]; B[smacc2::state_reactors::EgRandomGenerator::update] --> C;
```

The diagram illustrates a function call or dependency relationship. On the left, two white rectangular boxes with black borders represent source functions. The top box contains the text 'smacc2::state_reactors::EgRandomGenerator::onEntry' and the bottom box contains 'smacc2::state_reactors::EgRandomGenerator::update'. On the right, a larger gray rectangular box with a black border represents the target function, containing the text 'smacc2::state_reactors::EgRandomGenerator::postRandomEvents'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both source functions call or depend on the target function.
