The diagram shows a vertical inheritance relationship. The base class, 'boost::statechart::event< EvWaypoint110 < TSource, TOrthogonal > >', is represented by a white box with a black border, divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, 'cl\_move\_base\_z::EvWaypoint110 < TSource, TOrthogonal >', is represented by a gray box with a black border, also divided into three horizontal sections. The top section contains the class name, the middle section contains the public attribute '+ waypointIndex', and the bottom section is empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating inheritance.
