::postEvent

```
graph LR; A["cl_moveit2z::CbMoveEndEffector  
Trajectory::onOrthogonalAllocation"] --> C["smacc2::ISmaccClientBehavior  
::postEvent"]; B["cl_keyboard::CbDefaultKeyboard  
Behavior::postKeyEvent"] --> C;
```

The diagram illustrates a mapping or dependency between two source components and a single target component. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'cl\_moveit2z::CbMoveEndEffector Trajectory::onOrthogonalAllocation'. The bottom box contains the text 'cl\_keyboard::CbDefaultKeyboard Behavior::postKeyEvent'. On the right, there is a single gray rectangular box with a black border containing the text 'smacc2::ISmaccClientBehavior ::postEvent'. Two blue arrows originate from the right side of the top white box and the right side of the bottom white box, both pointing towards the left side of the gray box, indicating that both source components interact with or depend on the target component.
