

```
sm_dance_bot_strikes  
_back::StAcquireSensors  
::staticConfigure
```

```
graph LR; A["sm_dance_bot_strikes  
_back::StAcquireSensors  
::staticConfigure"] --> B["smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor"]
```

A diagram showing a call to staticConfigure from a state machine to a state reactor. The left box is shaded gray and contains the code for the state machine's staticConfigure method. A blue arrow points from this box to the right box, which is white and contains the code for the state reactor's static\_createStateReactor method.

```
smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor
```
