

A diagram illustrating a self-call. A grey rectangular box with a black border contains the text `smacc2::FlashLightPlugin` on the top line and `::TurnOn` on the bottom line. A blue curved arrow originates from the top edge of the box, arches upwards and to the right, and then points downwards to the top edge of the box, ending at a blue arrowhead. This represents a recursive or self-referential call to the `TurnOn` method.

```
smacc2::FlashLightPlugin  
::TurnOn
```
