The diagram consists of two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint157 < TSource, TOrthogonal > >`. It has three horizontal compartments: the top one for the class name, and two empty ones below it. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint157 < TSource, TOrthogonal >`. It has three horizontal compartments: the top one for the class name, the middle one containing the public attribute `+ waypointIndex`, and a bottom empty one. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.
