

cl\_move\_group\_interface  
::CbMoveKnownState::onEntry

```
graph LR; A[cl_move_group_interface::CbMoveKnownState::onEntry] --> B[cl_move_group_interface::CbMoveKnownState::loadJointStatesFromFile];
```

A diagram showing a call from the `onEntry` method to the `loadJointStatesFromFile` method. The `onEntry` method is in a white box on the left, and the `loadJointStatesFromFile` method is in a gray box on the right. A blue arrow points from the `onEntry` method to the `loadJointStatesFromFile` method.
