

```
sm_test_moveit_ur5e  
_gazebo_sim.construct  
_angle_degrees
```

A diagram illustrating a transformation between two code snippets. A blue arrow points from a gray box on the left to a white box on the right. The gray box contains the code for constructing a UR5e robot in a Gazebo simulation with angles in degrees. The white box contains the same code but with angles in radians.

```
sm_test_moveit_ur5e  
_gazebo_sim.construct  
_angle_radians
```
