The diagram shows a class hierarchy. The base class is `boost::statechart::event< EvWaypoint135 < TSource, TOrthogonal > >`, represented by a white box with a black border. It has two empty rectangular compartments below the header. The derived class is `cl_move_base_z::EvWaypoint135 < TSource, TOrthogonal >`, represented by a grey box with a black border. It has a header compartment, a compartment containing the attribute `+ waypointIndex`, and an empty compartment at the bottom. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance.
