

cl\_move\_group\_interface  
::CbMoveKnownState::onEntry

cl\_move\_group\_interface  
::CbMoveLastTrajectoryInitial  
State::onEntry

cl\_move\_group\_interface  
::CbMoveJoints::onEntry

```
graph LR; A[cl_move_group_interface::CbMoveKnownState::onEntry] --> C[cl_move_group_interface::CbMoveJoints::onEntry]; B[cl_move_group_interface::CbMoveLastTrajectoryInitialState::onEntry] --> C;
```

The diagram illustrates a mapping or inheritance relationship. On the left, two white rectangular boxes represent source functions. The top box contains the text 'cl\_move\_group\_interface::CbMoveKnownState::onEntry'. The bottom box contains the text 'cl\_move\_group\_interface::CbMoveLastTrajectoryInitialState::onEntry'. On the right, a gray rectangular box represents the target function, containing the text 'cl\_move\_group\_interface::CbMoveJoints::onEntry'. Two blue arrows originate from the right side of the two white boxes and point towards the left side of the gray box, indicating that both source functions are mapped to or inherit from the target function.
