::EgRandomGenerator::postRandom  
Events

```
graph LR; A["smacc2::state_reactors::EgRandomGenerator::onEntry"] --> C["smacc2::state_reactors::EgRandomGenerator::postRandomEvents"]; B["smacc2::state_reactors::EgRandomGenerator::update"] --> C;
```

The diagram illustrates a function call or dependency relationship. On the left, two white rectangular boxes with black borders contain the names of source functions: 'smacc2::state\_reactors::EgRandomGenerator::onEntry' (top) and 'smacc2::state\_reactors::EgRandomGenerator::update' (bottom). On the right, a larger gray rectangular box with a black border contains the name of the target function: 'smacc2::state\_reactors::EgRandomGenerator::postRandomEvents'. Two blue arrows originate from the right side of the source boxes and point towards the left side of the target box, indicating that both source functions call or depend on the target function.
