```
graph LR; A["smacc2::Transition<br/>::reactions::react_with<br/>_action"] --> D["smacc2::specificNamedOnExit"]; B["smacc2::Transition<br/>::reactions::react_without<br/>_action"] --> D; C["smacc2::specificNamedOnExit"] --> D; style D fill:#ccc,stroke:#333,stroke-width:1px
```

The diagram illustrates a relationship where three distinct elements on the left converge on a single target element on the right. The first two elements, 'smacc2::Transition::reactions::react_with_action' and 'smacc2::Transition::reactions::react_without_action', are contained within rectangular boxes. The third element, 'smacc2::specificNamedOnExit', is also in a box. All three boxes have arrows pointing towards a central, shaded rectangular box on the right, which is labeled 'smacc2::specificNamedOnExit'. This shaded box represents the final destination or a common state for the three preceding elements.
