::getName

```
graph LR; A[smacc2::ISmaccOrthogonal::addClientBehavior] --> D[smacc2::ISmaccOrthogonal::getName]; B[smacc2::ISmaccOrthogonal::initState] --> D; C[smacc2::ISmaccOrthogonal::runtimeConfigure] --> D;
```

The diagram consists of four rectangular boxes. On the left, there are three white boxes with black borders, each containing a text label. On the right, there is a single gray box with a black border, also containing a text label. Three blue arrows originate from the right side of each white box and point towards the left side of the gray box. The text in the gray box is centered and appears to be the common destination for the arrows from the three white boxes.
