

boost::statechart::
event< EvWaypoint191
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint191< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint191< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvWaypoint191< TSource, TOrthogonal > >`, is represented by a white box with a black border. It contains the class name and its template parameters. The derived class, `cl_move_base_z::EvWaypoint191< TSource, TOrthogonal >`, is represented by a gray box with a black border. It contains the class name, its template parameters, and a public member variable `+ waypointIndex`. A blue arrow with a hollow triangular head points from the derived class to the base class, indicating inheritance.

cl_move_base_z::EvWaypoint191
< TSource, TOrthogonal >

+ waypointIndex
