

smacc2::ISmaccOrthogonal  
::addClientBehavior

smacc2::ISmaccOrthogonal  
::runtimeConfigure

smacc2::ISmaccOrthogonal  
::getName

```
graph LR; A["smacc2::ISmaccOrthogonal::addClientBehavior"] --> C["smacc2::ISmaccOrthogonal::getName"]; B["smacc2::ISmaccOrthogonal::runtimeConfigure"] --> C;
```

The diagram illustrates a relationship between three methods. On the left, two white rectangular boxes with black borders contain the text 'smacc2::ISmaccOrthogonal::addClientBehavior' (top) and 'smacc2::ISmaccOrthogonal::runtimeConfigure' (bottom). On the right, a gray rectangular box with a black border contains the text 'smacc2::ISmaccOrthogonal::getName'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both 'addClientBehavior' and 'runtimeConfigure' are associated with or point to the 'getName' method.
