

```
boost::statechart::  
event< EvConditionalTrue  
< TReactorType, EmptyObjectTag > >
```

The diagram illustrates an inheritance relationship. A light blue box at the top represents the base class `boost::statechart::event< EvConditionalTrue< TReactorType, EmptyObjectTag > >`. A dark gray box at the bottom represents the derived class `smacc2::state_reactors::EvConditionalTrue< TReactorType, TReactorTag >`. A blue arrow points from the top of the dark gray box to the bottom of the light blue box, indicating that the dark gray box inherits from the light blue box.

```
smacc2::state_reactors  
::EvConditionalTrue< TReactor  
Type, TReactorTag >
```
