

sm_multi_stage_1::dc
_cycle_4::StiDCCycleLoop4
::loopWhileCondition

```
graph LR; A["sm_multi_stage_1::dc<br/>_cycle_4::StiDCCycleLoop4<br/>::loopWhileCondition"] --> B["smacc2::ISmaccState<br/>::getLogger"]
```

A diagram showing a call from a function in the `sm_multi_stage_1` namespace to a function in the `smacc2` namespace. The left box, which has a gray background, contains the text `sm_multi_stage_1::dc`, `_cycle_4::StiDCCycleLoop4`, and `::loopWhileCondition`. A blue arrow points from the right side of this box to the right box. The right box, which has a white background, contains the text `smacc2::ISmaccState` and `::getLogger`.

smacc2::ISmaccState
::getLogger
