```

The diagram shows a class hierarchy. The base class is 'boost::statechart::event< EvWaypoint217 < TSource, TOrthogonal > >'. It has two empty compartments below the name. The derived class is 'cl\_move\_base\_z::EvWaypoint217 < TSource, TOrthogonal >'. It has a compartment for the public attribute '+ waypointIndex' and one empty compartment below it. A blue arrow with an open triangle head points from the derived class to the base class, indicating inheritance.
