The diagram illustrates a class hierarchy. At the top is the base class `TCbRelativeMotion`, represented by a gray-shaded box with three horizontal compartments. Below it is the derived class `cl_nav2z::CbRetry<TCbRelativeMotion>`, shown in a white box with three compartments. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance. The derived class's second compartment contains a private member `- odomTracker_`, and its third compartment contains two public methods: `+ CbRetry()` and `+ onEntry()`.
