

boost::statechart::
event< EvWaypointFinal >

```
classDiagram
    class Base["boost::statechart::event< EvWaypointFinal >"]
    class Derived["cl_nitrosz::EvWaypointFinal"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. The base class, 'boost::statechart::event< EvWaypointFinal >', is represented by a white box with a black border and is divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, 'cl_nitrosz::EvWaypointFinal', is represented by a gray box with a black border and is also divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating that 'cl_nitrosz::EvWaypointFinal' inherits from 'boost::statechart::event< EvWaypointFinal >'.

cl_nitrosz::EvWaypointFinal
