

smacc2::ISmaccStateMachine
::mapBehavior

smacc2::ISmaccOrthogonal
::setGlobalSMData

smacc2::ISmaccStateMachine
::setGlobalSMData

```
graph LR; A["smacc2::ISmaccStateMachine::mapBehavior"] --> C["smacc2::ISmaccStateMachine::setGlobalSMData"]; B["smacc2::ISmaccOrthogonal::setGlobalSMData"] --> C;
```

The diagram illustrates a dependency or mapping between three functions. On the left, two white boxes with black borders represent source functions: 'smacc2::ISmaccStateMachine::mapBehavior' (top) and 'smacc2::ISmaccOrthogonal::setGlobalSMData' (bottom). On the right, a gray box with a black border represents the target function: 'smacc2::ISmaccStateMachine::setGlobalSMData'. Two blue arrows point from the source functions to the target function, indicating that both source functions are associated with or map to the target function.
