

```
boost::statechart::  
event< EvTransitionOnCleanup  
Error< TSourceObject, TOrthogonal > >
```

The diagram illustrates an inheritance relationship between two C++ classes. A light gray box at the top represents the base class, `boost::statechart::event< EvTransitionOnCleanupError< TSourceObject, TOrthogonal > >`. A dark gray box at the bottom represents the derived class, `cl_lifecyclenode::EvTransitionOnCleanupError< TSourceObject, TOrthogonal >`. A blue arrow with a hollow triangular head points from the top of the derived class box to the bottom of the base class box, indicating that the derived class inherits from the base class.

```
cl_lifecyclenode::EvTransition  
OnCleanupError< TSourceObject,  
TOrthogonal >
```
