

smacc2::state\_reactors  
::SrEventCountdown::triggers

```
graph LR; A["smacc2::state_reactors  
::SrEventCountdown::triggers"] --> B["smacc2::StateReactor  
::getLogger"]; B --> C["smacc2::ISmaccState  
::getLogger"]
```

The diagram illustrates a sequence of three components connected by blue arrows. The first component, on the left, is a gray box containing the text 'smacc2::state\_reactors' and '::SrEventCountdown::triggers'. A blue arrow points from this box to the second component, which is a white box containing 'smacc2::StateReactor' and '::getLogger'. Another blue arrow points from the second component to the third component, a white box containing 'smacc2::ISmaccState' and '::getLogger'.

smacc2::StateReactor  
::getLogger

smacc2::ISmaccState  
::getLogger
