

smacc2::SmaccState  
::getShortName

```
graph LR; A[smacc2::SmaccState::getShortName] --> B[smacc2::utils::cleanShortTypeName]; B --> B;
```

The diagram illustrates a function call. A grey rectangular box on the left contains the text 'smacc2::SmaccState' followed by '::getShortName' on a new line. A straight blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text 'smacc2::utils::cleanShort' followed by 'TypeName' on a new line. A curved blue arrow originates from the top of the white box and points back to the top of the same box, representing a self-call or loop.
