

smacc2::ISmaccOrthogonal  
::addClientBehavior

smacc2::ISmaccOrthogonal  
::runtimeConfigure

smacc2::ISmaccOrthogonal  
::getName

```
graph LR; A["smacc2::ISmaccOrthogonal::addClientBehavior"] --> C["smacc2::ISmaccOrthogonal::getName"]; B["smacc2::ISmaccOrthogonal::runtimeConfigure"] --> C;
```

The diagram illustrates a dependency or relationship between three methods. On the left, two white rectangular boxes with black borders represent source methods: 'smacc2::ISmaccOrthogonal::addClientBehavior' (top) and 'smacc2::ISmaccOrthogonal::runtimeConfigure' (bottom). On the right, a gray rectangular box with a black border represents the target method: 'smacc2::ISmaccOrthogonal::getName'. Two blue arrows point from the right side of each source box to the left side of the target box, indicating that both source methods depend on or interact with the target method.
