The diagram shows a class hierarchy. The base class, `boost::statechart::event< EvWaypoint206 < TSource, TOrthogonal > >`, is represented by a white box with a black border. It has two empty rectangular compartments below its name. The derived class, `cl_move_base_z::EvWaypoint206 < TSource, TOrthogonal >`, is represented by a gray box with a black border. It has a third compartment containing the attribute `+ waypointIndex`. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.
