The diagram illustrates a dependency or inheritance relationship. Three boxes on the left, each containing a function name with a namespace (cl\_nav2z::CpCostmapSwitch), have arrows pointing to a single box on the right. The boxes on the left are labeled ::disable, ::enable, and ::onInitialize. The box on the right is labeled ::getStandardCostmapName. The box on the right is shaded gray, while the others are white with black borders. The arrows are blue.
