

boost::statechart::  
event< EvFail >

```
classDiagram
    class Base["boost::statechart::event< EvFail >"]
    class Derived["sm_respira_1::EvFail"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. The base class, 'boost::statechart::event< EvFail >', is represented by a white rectangle with a black border, divided into three horizontal sections. The top section contains the class name, while the middle and bottom sections are empty. The derived class, 'sm\_respira\_1::EvFail', is represented by a gray rectangle with a black border, also divided into three horizontal sections. The top section contains the class name, and the middle and bottom sections are also empty. A blue arrow with a hollow triangular head points from the top edge of the derived class box to the bottom edge of the base class box, indicating that 'sm\_respira\_1::EvFail' inherits from 'boost::statechart::event< EvFail >'.

sm\_respira\_1::EvFail
