The diagram shows a vertical inheritance relationship. The base class, 'boost::statechart::event< EvWaypoint256 < TSource, TOrthogonal > >', is represented by a white box with a black border. The derived class, 'cl_move_base_z::EvWaypoint256 < TSource, TOrthogonal >', is represented by a grey box with a black border. A blue arrow with an open triangular head points from the derived class to the base class. The derived class box contains a public attribute '+ waypointIndex' in its second compartment.
