

boost::statechart::
event< EvWaypoint215
< TSource, TOrthogonal > >

```
classDiagram
    class Base["boost::statechart::event< EvWaypoint215< TSource, TOrthogonal > >"]
    class Derived["cl_move_base_z::EvWaypoint215< TSource, TOrthogonal >"]
    Derived --|> Base
```

The diagram shows a base class box with a white background and a derived class box with a gray background. The base class box contains the text 'boost::statechart::event< EvWaypoint215< TSource, TOrthogonal > >' in its top section, with two empty sections below it. The derived class box contains 'cl_move_base_z::EvWaypoint215< TSource, TOrthogonal >' in its top section, '+ waypointIndex' in its middle section, and an empty section at the bottom. A blue arrow with an open triangle head points from the top of the derived class box to the bottom of the base class box.

cl_move_base_z::EvWaypoint215
< TSource, TOrthogonal >

+ waypointIndex
