

TCbRelativeMotion

```
classDiagram
    class TCbRelativeMotion {
    }
    class cl_nav2z_CbRetry["cl_nav2z::CbRetry<TCbRelativeMotion>"] {
        - odomTracker_
        + CbRetry()
        + onEntry()
    }
    cl_nav2z_CbRetry --|> TCbRelativeMotion
```

The diagram illustrates a class hierarchy. At the top is the base class 'TCbRelativeMotion', represented by a rectangle with a light gray header and two empty gray body sections. Below it is the derived class 'cl\_nav2z::CbRetry<TCbRelativeMotion>', shown as a white rectangle with three sections: a header for the class name, a middle section for the private attribute '- odomTracker\_', and a bottom section for public methods '+ CbRetry()' and '+ onEntry()'. A blue arrow with an open triangular head points from the derived class to the base class, indicating inheritance.

cl\_nav2z::CbRetry<  
TCbRelativeMotion >

- odomTracker\_

+ CbRetry()  
+ onEntry()
