

sm\_pack\_ml::execute  
\_sequence\_a::StiExecuteSequence  
ALoop::loopWhileCondition

```
graph LR; A["sm_pack_ml::execute  
_sequence_a::StiExecuteSequence  
ALoop::loopWhileCondition"] --> B["smacc2::ISmaccState  
::getLogger"]
```

The diagram consists of two rectangular boxes connected by a blue arrow pointing from left to right. The left box has a light gray background and contains three lines of text: 'sm\_pack\_ml::execute', '\_sequence\_a::StiExecuteSequence', and 'ALoop::loopWhileCondition'. The right box has a white background and contains two lines of text: 'smacc2::ISmaccState' and '::getLogger'.

smacc2::ISmaccState  
::getLogger
