

cl\_nav2z::CbNavigateNamed  
Waypoint::onEntry

cl\_nav2z::CbSeekWaypoint  
::onEntry

cl\_nav2z::CpWaypointNavigator  
Base::seekName

```
graph LR; A[cl_nav2z::CbNavigateNamedWaypoint::onEntry] --> C[cl_nav2z::CpWaypointNavigatorBase::seekName]; B[cl_nav2z::CbSeekWaypoint::onEntry] --> C;
```

The diagram illustrates a relationship between two callback functions and a base class method. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'cl\_nav2z::CbNavigateNamedWaypoint::onEntry' and the bottom box contains 'cl\_nav2z::CbSeekWaypoint::onEntry'. On the right, there is a gray rectangular box with a black border containing the text 'cl\_nav2z::CpWaypointNavigatorBase::seekName'. Two blue arrows point from the right side of each white box to the left side of the gray box, indicating that both callback functions are associated with or inherit from the 'seekName' method of the 'CpWaypointNavigatorBase' class.
