

```
boost::statechart::  
event< EvTransitionOnConfigure  
Error< TSourceObject, TOrthogonal > >
```

The diagram shows a UML class hierarchy. At the top is a white box representing the base class `boost::statechart::event< EvTransitionOnConfigureError< TSourceObject, TOrthogonal > >`. It has two empty rectangular slots below the text. Below it is a grey box representing the derived class `cl_lifecyclenode::EvTransitionOnConfigureError< TSourceObject, TOrthogonal >`, also with two empty rectangular slots. A blue arrow with an open triangular head points from the top of the grey box to the bottom of the white box, indicating inheritance.

```
cl_lifecyclenode::EvTransition  
OnConfigureError< TSourceObject,  
TOrthogonal >
```
