

cl_move_base_z::backward
_local_planner::BackwardLocalPlanner
::configure

```
graph LR; A["cl_move_base_z::backward  
_local_planner::BackwardLocalPlanner  
::configure"] --> B["cl_move_base_z::backward  
_local_planner::declareOrSet"]
```

A diagram showing a call to the `configure` method of the `BackwardLocalPlanner` class. The call is made from the `backward` method of the `cl_move_base_z` namespace. The call is represented by a box with a gray background and a black border. A blue arrow points from this box to another box on the right, which represents the `declareOrSet` method of the `BackwardLocalPlanner` class.
