

```
sm_dance_bot_warehouse  
::StAcquireSensors::staticConfigure
```

```
graph LR; A["sm_dance_bot_warehouse  
::StAcquireSensors::staticConfigure"] --> B["smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor"]
```

A diagram showing a call from a static configure function to a static state reactor creation function. A grey box on the left contains the code `sm_dance_bot_warehouse::StAcquireSensors::staticConfigure`. A blue arrow points from this box to a white box on the right. The white box contains the code `smacc2::SmaccState < StAcquireSensors, MsDanceBotRunMode >::static_createStateReactor`.

```
smacc2::SmaccState  
< StAcquireSensors,  
MsDanceBotRunMode >  
::static_createStateReactor
```
