

boost::statechart::
event< EvFail >

```
classDiagram
    class boost_statechart_event["boost::statechart::event< EvFail >"]
    class sm_multi_stage_1_evfail["sm_multi_stage_1::EvFail"]
    boost_statechart_event <|-- sm_multi_stage_1_evfail
```

The diagram consists of two class boxes. The top box, representing the base class, is divided into three horizontal sections. The first section contains the text 'boost::statechart::' on the first line and 'event< EvFail >' on the second line. The second and third sections are empty. The bottom box, representing the derived class, is also divided into three horizontal sections. The top section contains the text 'sm_multi_stage_1::EvFail'. The second and third sections are empty. A blue arrow with an open triangular head points from the top section of the bottom box to the bottom edge of the top box, indicating an inheritance relationship.

sm_multi_stage_1::EvFail
