::generateTrajectory"] --> D;
```

The diagram illustrates a mapping or inheritance relationship. Three source boxes on the left, each containing a namespace and two function names, have blue arrows pointing to a single target box on the right. The target box also contains a namespace and two function names. The source boxes are: 1) 'cl_move_group_interface' with functions 'CbCircularPouringMotion' and 'createMarkers'; 2) 'cl_move_group_interface' with functions 'CbMoveCartesianRelative2' and 'generateTrajectory'; 3) 'cl_move_group_interface' with functions 'CbCircularPouringMotion' and 'generateTrajectory'. The target box is 'cl_move_group_interface' with functions 'CbMoveEndEffectorTrajectory' and 'getCurrentEndEffectorPose'.
