

boost::statechart::
event< EvFail >

```
classDiagram
    class Base["boost::statechart::event< EvFail >"]
    class Derived["sm_respira_1::EvFail"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. The base class, `boost::statechart::event< EvFail >`, is represented by a white box with three horizontal compartments. The top compartment contains the class name, while the other two are empty. The derived class, `sm_respira_1::EvFail`, is represented by a gray box with three horizontal compartments. The top compartment contains the class name, while the other two are empty. A blue arrow with an open triangular head points from the top of the derived class box to the bottom of the base class box, indicating that `sm_respira_1::EvFail` inherits from `boost::statechart::event< EvFail >`.

sm_respira_1::EvFail
