

cl_move_group_interface
::CbCircularPivotMotion
::generateTrajectory

```
graph LR; A["cl_move_group_interface::CbCircularPivotMotion::generateTrajectory"] --> B["cl_move_group_interface::CbCircularPivotMotion::computeCurrentEndEffectorPoseRelativeToPivot"]
```

A diagram showing a call from the `generateTrajectory` method of the `cl_move_group_interface::CbCircularPivotMotion` class to the `computeCurrentEndEffectorPoseRelativeToPivot` method of the same class. The source box is white with a black border, and the target box is gray with a black border. A blue arrow points from the source to the target.
