

boost::statechart::
event< EvGlobalError >

```
classDiagram
    class Base["boost::statechart::event< EvGlobalError >"]
    class Derived["sm_dance_bot::EvGlobalError"]
    Base <|-- Derived
```

The diagram illustrates an inheritance relationship. At the top is a white rectangular box representing the base class 'boost::statechart::event< EvGlobalError >'. It is divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. Below this box is a blue arrow pointing upwards, with a hollow blue triangle at its tip. At the bottom is a gray rectangular box representing the derived class 'sm_dance_bot::EvGlobalError'. It is also divided into three horizontal sections: the top section contains the class name, and the two bottom sections are empty. The gray fill of the bottom box indicates that it inherits from the base class.

sm_dance_bot::EvGlobalError
