The diagram consists of two class boxes. The top box is white and represents the base class `boost::statechart::event< EvWaypoint146 < TSource, TOrthogonal > >`. It has two empty rectangular compartments below the name. The bottom box is gray and represents the derived class `cl_move_base_z::EvWaypoint146 < TSource, TOrthogonal >`. It has a compartment for the public member `+ waypointIndex` below its name, and another empty compartment at the bottom. A blue arrow with an open triangular head points from the bottom box to the top box, indicating inheritance.
