

```
boost::statechart::  
event< EvTrue< TSource,  
        TState > >
```

A UML class diagram showing inheritance. The base class is 'boost::statechart::event< EvTrue< TSource, TState > >' and the derived class is 'smacc2::event_generators::EvTrue< TSource, TState >'. A blue arrow points from the derived class to the base class. Both classes have two empty compartments below the name.

```
smacc2::event_generators  
::EvTrue< TSource, TState >
```
