

```
boost::statechart::  
event< EvTransitionOnError  
Failure< TSourceObject,  
    TOrthogonal > >
```

A UML class diagram showing inheritance. A light gray box at the top represents the base class `boost::statechart::event< EvTransitionOnErrorFailure< TSourceObject, TOrthogonal > >`. A darker gray box at the bottom represents the derived class `cl_lifecyclenode::EvTransitionOnErrorFailure< TSourceObject, TOrthogonal >`. A blue arrow points from the bottom box to the top box, indicating that the bottom class inherits from the top class. Both boxes have two empty compartments below the main text area.

```
cl_lifecyclenode::EvTransition  
OnErrorFailure< TSourceObject,  
    TOrthogonal >
```
