

```
function< void(std  
::shared_ptr< smacc2  
::StateReactor >)>
```

The diagram consists of two class boxes. The top box is white and contains a function signature. The bottom box is gray and contains a class name. A vertical line connects the two boxes, with a hollow diamond at the bottom box, indicating an aggregation relationship. The label '+fn' is placed to the right of the line.

+fn

```
smacc2::introspection  
::StateReactorCallbackFunctor
```
