smacc2::specificNamedOnExit

smacc2::specificNamedOnExit

```
graph LR; A["smacc2::Transition<br/>::reactions::react_with<br/>_action"] --> D["smacc2::specificNamedOnExit"]; B["smacc2::Transition<br/>::reactions::react_without<br/>_action"] --> D; C["smacc2::specificNamedOnExit"] --> D; style D fill:#ccc
```

The diagram illustrates a relationship where three distinct elements on the left converge on a single target element on the right. The first two elements, 'smacc2::Transition::reactions::react_with_action' and 'smacc2::Transition::reactions::react_without_action', are contained within white rectangular boxes. The third element, 'smacc2::specificNamedOnExit', is also in a white box but is positioned below the others. All three of these boxes have blue arrows pointing towards a single, horizontally-oriented box on the right. This target box, which contains the text 'smacc2::specificNamedOnExit', has a gray fill and a black border, distinguishing it from the other three boxes.
