

```
cl_move_group_interface  
::CbCircularPivotMotion  
::generateTrajectory
```

A diagram showing a call from the `generateTrajectory` method in the `cl_move_group_interface::CbCircularPivotMotion` namespace to the `computeCurrentEndEffectorPoseRelativeToPivot` method in the same namespace. A blue arrow points from the `generateTrajectory` method in the left box to the `computeCurrentEndEffectorPoseRelativeToPivot` method in the right box.

```
cl_move_group_interface  
::CbCircularPivotMotion  
::computeCurrentEndEffectorPose  
RelativeToPivot
```
